

## Senior Application Developer - Description

---

Interphase Systems, Inc. is growing our Application Development Team. We have a great opportunity for a Senior Developer with 6-10 years of experience providing application architecture and development utilizing Microsoft and other technologies. The successful candidate will work on several client initiatives and will be based primarily out of our Plymouth Meeting, PA corporate office.

The candidate selected must have strong analytical, design, oral and written communication skills and be able to provide support with the highest level of customer satisfaction.

Candidates will have experience in the following areas:

- Extensive knowledge and experience in web development (ASP, ASP.net, AJAX, etc.)
- Strong C# experience
- Strong documentation experience
- Experience with Telerik and other Control Suites
- Experience working with RAD Controls for ASP.NET and AJAX
- Database experience including SQL Server, Data Model Design, Stored Procedures, etc.
- High-volume Transaction system experience
- Custom controls and libraries for Dot Net
- CSS Development
- PDF (creation from within web app)
- CSV (importing/exporting)
- AJAX
- SharePoint development experience would be preferred
- Client consulting experience preferred

This position is full time with Interphase Systems, Inc. Compensation rate will be based on experience.

Strong Communication Skills are an absolute must.

Send resume and cover letter INCLUDING COMPENSATION REQUIREMENTS to careers@interphasesystems.com. Include "SR-DEV" in the subject line.

Skills: ASP, ASP.NET, SQL, AJAX, Script Development, Telerik, Strong Communication Skills
